A prenatal pathway was developed to manage pregnant walk-ins. Patients who need less urgent ongoing care are connected to a PCP at a partner CHC within 3 weeks. Patients who need less urgent ongoing care are connected to a PCP at a partner CHC within 1-3 weeks. Patients who need less urgent ongoing care are connected to a PCP at a partner CHC within 1-3 weeks.

Collaboration with Toronto Public Health (TPH)
• TPH is committed to providing health services and programs to all Toronto residents.
• The NIWIC has partnered with TPH to advance the health of non-status/uninsured persons.

TPH RN is available at the NIWIC once a week to provide health assessments and community referrals.

A CHC referral process was established to link patients with chronic and/or complex health issues to a primary care provider and primary health care team for ongoing monitoring and follow-up.
